

Year R Home Learning W/C 18.5.20

Topic: Castles

Understanding of the World

1. Spend some time looking at old photographs of you and your family. How have you changed? How has anything else in the picture changed (was it taken in a different house, were you at a park with different plants than your garden?)
2. Make a video talking about life now and how it is different to 'normal'. This will be a something you can look at together in the future.
3. Try making a boat and see if it will float. Did you choose a good material? Discuss floating and sinking and why your materials worked/didn't work.
