- Mogladon (Stanley) p26
- Niceozaurus (Zak) p27

Stegosaurus

Appearance

The Stegosaurus was large and heavy. It has large plates along its back and a spiked tail.

Diet

The Stegosaurus is a herbivore and was eating plants or food.

Habitat

The Stegosaurus lives in the wetlands with a forest which suits their diet.

Amazing Facts

The plates changed colour when it was excited or scared.

TYRANNOSAURUS REX

Appearance

T-rex was the largest dinosaur ever. It was big as a bus. This dinosaur was heavy as four rhinos. It was covered in scales like a reptile. The huge head balanced it's tail. It walked on two powerful legs but it had two small arms.

Diet

T-rex is a carnivore. It had large and pointed teeth. It eats a lot of meat at one time and it doesn't eat in a few days.

Habitat

T-rex lived in forests, near rivers and in areas that are open.

Amazing Facts

T-rex means King of the tyrant lizards. He can run very fast. He had good eye sight to see

Ou Raurosauk

Appearance

He is scary.

He's got a big

plates. He has
sharp claws.

He has four
legs.

Diet

He is a herbivore

he eats plants.

Habitat

He lives in Niger

it is hot, there

is a forest and

deserts.

Amazing Facts

Ou Raurosauk means

Brave Lisaeta

Habitats

- Plains
- Swamps
- Desert
- Shorlines
- Forest

Dpe

- can't breathe
- ears near
- sharp teeth
- Herbivore
- 25 leaves
- flat feet

Types of Dino's

- T-rex
- Velociraptor
- Triceratops
- Parasaurolophus

Appearance

- scales
- feathers
- plates
- smooth and
- rough

Devoldayurag

Appearance

He is orange
and red.
He has big
teeth. His
skin is scaly.

Diet

He eats sharks
and Allosaurus.
He is a
carnivore.

Habitat

He lives in
the ocean.
He hides in
the sand,
He comes up
for oxygen.

Amazing Facts

He is a good swimmer.

T-Rex

Appearance

Sharp teeth

Little arms

Four legs

Very scary

Diet

he is a carnivore

he eats meat

Habitat

he lives in

Canada there

is deserts forests

and sea

Amazing Facts

pigeons are the family of T-Rex

MAY DINIOT

Fun fact
The Gmelasome has 10 teeth
so it swallows
stones to
grind leaves
in its tummy.

This is the Gmelasome

Appearance

The Gmelasome has a large purple
head with bumps on top to defend
itself.

Habitat

The Gmelasomes live in the Ostrinia
cabbage in the grass and trees. It
likes to live in the soil!

Diet

The Gmelasome eats leaves and
grass. It uses the bumps on
its head to knock leaves off
of the trees. It is a herbivore.

by Grace Davis

The Graculus

APPEARANCE

The Graculus is not tall and has short arms but it has long legs with sharp claws. It has sharp claws on its back that goes down to the tail.

DIET

The Graculus is a herbivore and it likes eating plants, there are short trees in the forests which are good for the Graculus because it can reach up to the leaves.

HABITAT

in

The Graculus lives in the forests because it is quiet and there are a lot of trees so they can hide from the big dinosaurs.

Amazing Facts

- It has sharp claws on its back and tail. These help it fight off the dinosaurs.
- Long legs to help them jump very far.

Triceratops ✓

Appearance

The triceratops has 3 horns and a part of like beak. It walked on 4 legs.

Diet

The Triceratops is a herbivore. They liked to eat palms and ferns.

Habitat

The Triceratops lived in dry forested areas and plains where there was lots of vegetation.

Amazing Facts

- Ideal beak for snapping branches
- The largest known skull is 4.5 meters in length.

Crocodorius

Appearance

He has a yellow tongue, it is long and he can get other dinosaurs with it. He is short but long. He has some blunt teeth and lots of teeth because he is an omnivore.

Diet

My dinosaur eats less and other dinosaurs and dinosaurs that swim by using his sharp teeth. He drinks lava, water and dinosaur blood like Raptors.

Habitat

He lives in a cave under the water. It is so dark in it no other animals can see. It rolls around in the lava because it warms up his scaly green skin.

Amazing facts

- A Crocodorius lives for 10000 years.
- He grows up to 10 meters long.
- He has a billion sharp, pointed teeth.

Velociraptor

Appearance

I have big back legs
Small front legs,
a long tail, a pointed
head, menacing eyes
and long sharp teeth

Diet

I am a carnivor and
I deely eat meat
from animall. thats

onee animl that is

smaller than me

Habitat

I live in a forest
with not much water
and some tigh
ms we have sand

stomc

Amazing Facts

My clawls are not mere for teer^{ing}

they are amert to hold on tigh ter
to the prey

My Dinosaur Encyclopedia

The ~~so~~ Spinosaurus Fro is
a meat eater. He ^{was} ~~is~~ big &
feath some thing meat. He had
a Bump Tail to swipe away
his enemy. He lives in
a cave in the volcano.

~~It has 4 teeth.~~

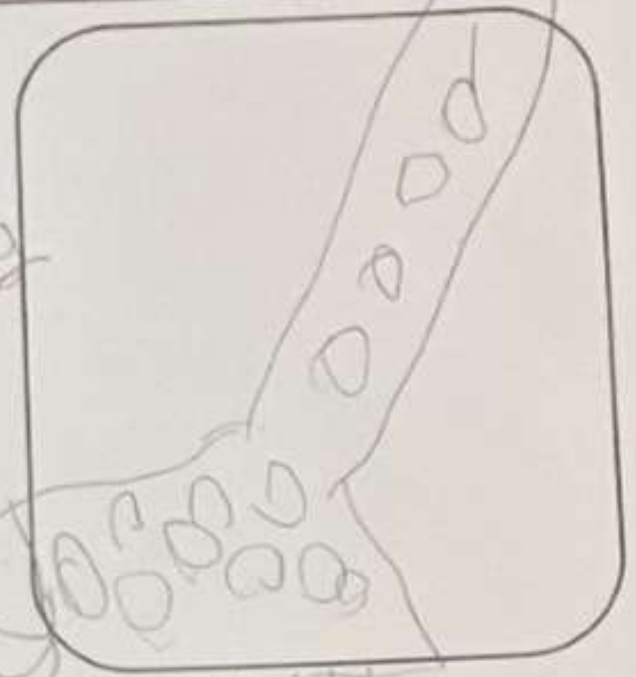

1 max for Foot

his eye BROWS to protect his eye
as from the sun. Still so he can
live better.

DIPLODOCUS

Appearance

short blue
with a long
neck

Diet

She is
a herbivore
it and
eats
plants

Habitat

in
the forest.

Amazing Facts

the longest
dinosaur.

Tyrannosaurus Rex

Tyrannosaurus Rex live...

55 million

years ago

there was

of trees

There was no

people.

Tyrannosaurus Rex eat...

meat and

carnivore.

he's got

sharp teeth.

Tyrannosaurus Rex ^{looks like} survive...

he was green

he is dark green and lustrous

He is big.

His teeth were sharp.

Miribelomys

Appearance

She has long wavy scales and long gray eyes. It has soft gummy teeth. So it can eat plants as well. It has a long snout.

Diet

It is a herbivore because it has small smooth teeth. She eats leaves and soft plants.

Habitat

Miribelomys lives in the forests.

There are lots of gummy trees and plants. I can hear dinosaur scratching their sharp point claws.

Making Faces

It can get what it wants. It is the roundest dinosaur in the world.

Tri-Rex

Appearance:

He has sharp
teeth
Eaten

Habitat:

The hills
The sea
The beach

Diet:

The Tri-Rex is an omnivore

He eats F O T M S and d u r e s

Amazing Facts:

He can run up to 40 mph

He hunts in the
sand, water and land

Pascadalocus

Appearance

The Pascadalocus has a long neck, a long tail, scales and 4 legs.

It is green and large dinosaur.

Diet

The Pascadalocus is a herbivore.

It eats plants and leaves.

It has flat teeth.

Habitat

It lives in the forest.

There I can see big trees and I can hear birds singing and I can feel cold.

Amazing Facts

The Pascadalocus is a reptiles animal. I love it because it is clever.

Nice or rug

Appearance

googly eyes,
big spikes
sharp teeth
cute little
rainbow

Diet

He eats
Meat. He
likes
Sausages.

Habitat

He lives in
a forest
and swims
in water.

Amazing Facts

good hunter, very fast
+ can be invisible.
