

# Dinosaur Teeth

---

Encourage your child to read as much of this as possible.  
They can sound out lots of the words.

# What did dinosaurs eat?

---

Some dinosaurs ate meat.

Some dinosaurs ate leaves, ferns and small trees.

# Meat eating teeth

---

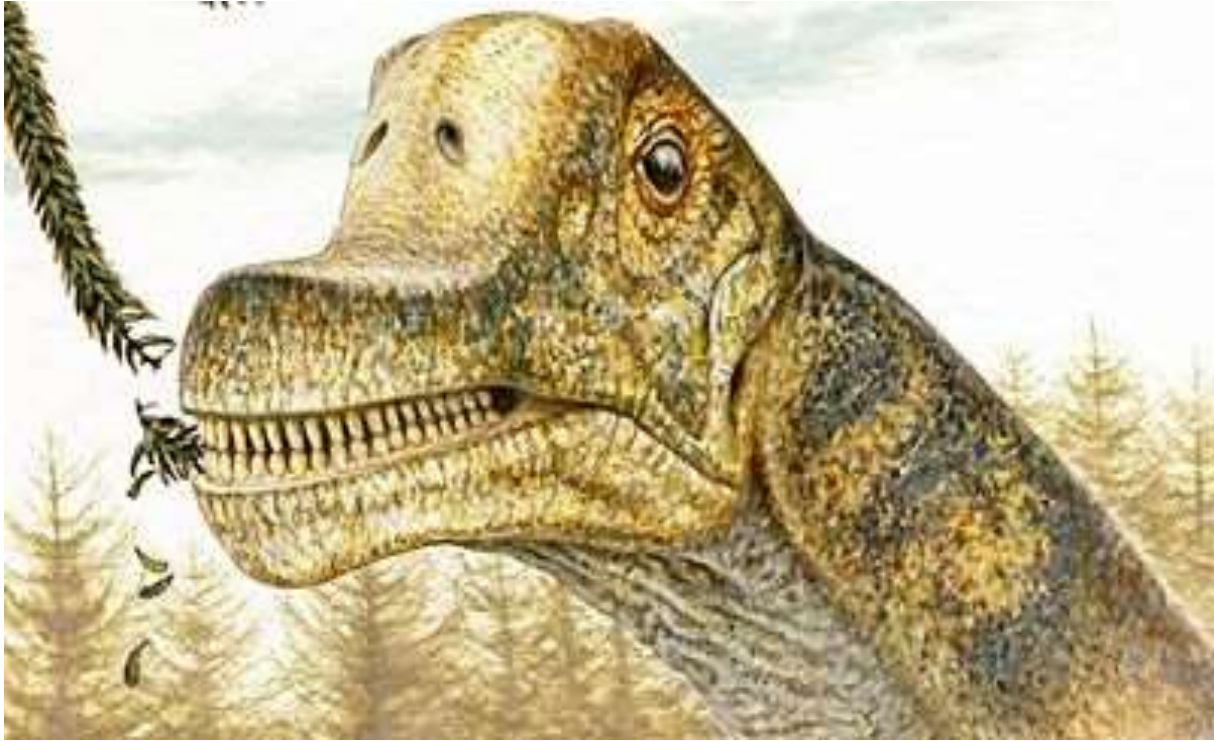

Dinosaurs that ate meat had to have sharp teeth to cut through flesh.

They are called carnivores.

# Plant eating teeth

---

Dinosaurs that ate plants had flat teeth to grind up the leaves.

They are called herbivores.

# No teeth!

---

A diplodocus had no teeth!

Scientists think that they ate stones to help break up the leaves they ate.
