

# Driposaurus

## Appearance

A Driposaurus has a long body with narrow legs. On the end of its legs there are sharp claws. The plates on its back rattle together to scare away predators.

## Diet

The Driposaurus is an omnivore. It enjoys eating small fish as a tasty snack but also likes slimy, green weeds that grow in the lakes. It can drink up to 1000 litres of water a day.

## Habitat

The Driposaurus lives near rivers and lakes. It can be found swimming in deep lakes or resting under trees.

## Amazing Facts

- A good swimmer with webbed feet.
- Hunted in the water and on land.
- Swallowed large fish whole.
