

# Year 1 Learning at Home: Week 14 - Maths 13-7-20

Aim to complete one activity from this page with your child each day. This week we will be continuing with multiplication. Children should be able to watch these independently but will need to know how to pause and restart to complete activities. Always have a pencil and paper ready.

## Activity 1: Watch the multiplication 3 [Video 2](#)

Follow up activity: Make your own bar models using the two times table. Here is an example of  $5 \times 2 = 10$  which is also  $10 = 5 \times 2$ . Remember your new key words: **Product** and **Factor**.

10				
2	2	2	2	2

## Activity 2: Watch the multiplication 3 [Video 3](#)

Follow up activity: represent this sentence with pictures, a bar model and equations.

The product of seven and two is fourteen.

Here is an example using a different sentence:

Practice activity  
The product of four and two is eight.

$4 \times 2 = 8$   
 $8 = 4 \times 2$

## Activity 3: Watch the multiplication 2 [Video 4](#)

Follow up activities: The following picture does not match the equation. Can you work out why? Can you create a picture that matched the equation correctly?

$$12 = 6 \times 2$$

## Activity 4: Watch the multiplication 3 [Video 5](#)

### Further practise:

If you would like to continue learning through these videos (they go up to 13) you can watch them from [here](#).
