

## Lesson 5: Comparing people

### Introduction

During this lesson learners will understand that people can be described using attributes. They will practise using attributes to describe images of people and other learners in the class. The learners will collect the data needed to organise people using attributes, and create a pictogram to show this pictorially. Finally, learners will draw conclusions from their pictograms and share their findings.

### Learning objectives

To recognise that people can be described by attributes

- I can choose a suitable attribute to compare people
- I can collect the data I need
- I can create a pictogram and draw conclusions from it

### Key vocabulary

Attribute, compare, tally chart, pictogram, more than, less than, most popular, least popular, conclusion

## Questions

Can you collect data to help you answer the questions below?

**What is the most common hair colour in your family?**

**What is the most common eye colour in your family?**

**What is the most common favourite vegetable in your family?**

**What is your family's favourite children's book?**

**What is your family's favourite dinner?**

**What is your family's favourite colour?**

### TASK

Create a pictogram chart to find out the totals. Then complete the other sheet by choosing one of the questions and complete a tally chart attached.

## Tally charts

Choose a question based on the attributes of the people in your family or close friends and complete the tally chart below.

**My Question:**

---

	<b>Tally</b>	<b>Total</b>
