

Tyrannosaurus Rex

Appearance

The T-Rex was 13 m long and weighed up to 7 tons. The T-Rex had two small arms and two clawed fingers. It had over 60 sharp teeth and a powerful jaw.

Diet

The T-Rex was a carnivore (meat eater). It preyed on living animals. It would use its sharp, jagged teeth to chomp through the flesh and bones of its prey.

Habitat

The T-Rex lived in forests near rivers and in areas that were open and full of prey. It dominated the forested river valleys in western North America.

Amazing Facts

Tyrannosaurus means Tyrant Lizard. Its powerful bite was up to ten times more powerful than a crocodile.
