

Write three numbers less than 11.

Which number comes before 15?

Which number comes first on the number line 16 or 12?

Which number comes after 18?

How many jumps on the number line between 10 and 15?

NB Children often miscount when using the number line as they count 10 as the first number, rather than counting the jumps. This is a useful skill to practice between different number pairs if your child answers this question incorrectly.

Write two numbers between 13 and 17
