

Dare To Learn

Year 2 Home Learning Task

Earlier this week the children went for a walk looking for the range of plants and flowers that are growing around the local area. However, the weather recently has not been on our side and on this day, it had previously been raining hard and a cold frost had arrived. This left us with very little plants to find!

The weather this weekend is looking good, Sunday even shows sunshine!

Please can you find time to pop out for a walk this weekend and perhaps go a little further than we could and tally the flowers you find, maybe you have some in your own garden?

We are sending the children home with a blank tally chart, they can then draw and label the plants they find and tally up how many they have seen.

The collection of these are crucial for our next science session when we will be looking at this data and turning it into a graph for analysis.

Thank you for your ongoing support

The Year 2 Team
